

Qualified Overnight Adult and Paediatric Sleep Technicians

The Woolcock Institute of Medical Research (WIMR) is a world-renowned medical research institute focusing on the causes, prevention, diagnosis and treatment of sleep disorders and respiratory disease. A number of exciting new positions are available for suitably qualified Adult and Paediatric Sleep Technicians who enjoy night work. You will be engaged in the setup, care and performance of usual clinical diagnostic and CPAP titration patient polysomnography, as well as being exposed to our cutting edge sleep research in the areas of quantitative EEG analysis, REM Behaviour disorder and Parkinson's disease, COPD and obstructive sleep apnoea. If you are looking for change and a challenge, one of these roles could be for you!

The positions are casual in commencement with a view to on-going part-time work in our busy 14 bed research and clinical sleep unit. Flexible rostering and weekday and weekend nights are available.

All roles require patient and research focused, technically excellent polysomnography (PSG) provision. Experience using Compumedics Grael, Philips PDx and Alice 6 systems with Resmed Tx, S9 and Philips-Respironics CPAP machines advantageous. Working at the WIMR will provide you with:

- The ability to work alongside Australia's largest interdisciplinary sleep clinic – encompassing neurology, dentistry, psychiatry, allergy and immunology, psychology, sleep and respiratory, ante-natal and paediatric sleep, exercise physiology and nutrition, endocrinology, otolaryngology and CPAP therapy.
- The opportunity to grow professionally and learn more about sleep research while putting your existing sleep knowledge and expertise to work.
- A generous salary packaging opportunity for full-time and part-time employees.
- Further study and research opportunities.

Your activities would include:

- Adoption of an instructional role in health care for patients, relatives, technical and other sleep unit staff.
- Overnight 10/20 setup of patients and overnight PSG monitoring and NIV titration/treatment optimisation.

To be successful in applying for one of these roles, you will need to possess the following:

- Must have a minimum of 12 months Adult OR Paediatric (dependent on the position being applied for) PSG and CPAP titration experience.
- Be well organised with an eye for detail.
- Must possess genuine patient empathy and be patient focused.
- Excellent communicator with a passion to impart knowledge.
- Strong work ethic and capacity to work independently as well as part of a team.
- Computer skills especially in relation to medical and technical softwares.
- The right to work in Australia.

Initial enquiries/further details, please contact Carla Evans, Chief Senior Technologist, on telephone 0291140244 or email carla.evans@sydney.edu.au

To apply: Send your CV along with a cover letter specifying why you think you are the best candidate for one of these positions to recruitment@woolcock.org.au by Sunday 16th July 2017.
