

Sleep Medicine – Night Sleep Technician Position Advertisements - 2017

Night Technician Position

Experienced and enthusiastic full time permanent night shift Sleep Technician required to work at both of our sleep laboratories at Warners Bay Private Hospital and Maitland Private Hospital (in the Hunter Valley – Newcastle-Lake Macquarie). At least 1 year of full time Sleep Technician experience is required. Qualifications are desirable. Above award rates of pay, and educational opportunities provided. Some day work also required.

Skills Required

Effective communication – the ability to communicate well with patients, carers and relatives, the nursing and hospital team and Sleep Medicine teams of staff members.

Patient care experience – you will be conducting night diagnostic testing, participating in Quality Assurance activities and gaining some experience of the day time laboratory diagnostics and clinics.

Customer service – excellence in putting the patient first and at the centre of all that you do, possessing empathy.

Computer literacy – ability to use various computer systems, medical and technical software programs and have your own email account for communication

Ability to follow direction – adhere to policy and procedure and attend regular meetings to remain updated with the organisation.

Ability to work alone and troubleshoot problems – although supported by nursing staff on night shift and a technical manager on call you will mostly work alone.

Having an eye for detail and being well organised

Night Shift 7.30pm to 7.30am

Open six nights per week (closed Saturday nights). Preferences for particular nights considered and provided when possible.

Some day hours within the 38 hours per week to attend compulsory education and meetings is a requirement of employment

First aid certificate required – training provided for same.
